007.03(A) The regulatory asset adequacy issues summary shall include:

007.03(A)(1) Descriptions of the scenarios tested (including whether those scenarios are stochastic or deterministic) and the sensitivity testing done relative to those scenarios. If negative ending surplus results under certain tests in the aggregate, the actuary should describe those tests and the amount of additional reserve as of the valuation date which, if held, would eliminate the negative aggregate surplus values. Ending surplus values shall be determined by either extending the projection period until the in force and associated assets and liabilities at the end of the projection period are immaterial or by adjusting the surplus amount at the end of

the projection period by an amount that appropriately estimates the value that can reasonably be expected to arise from the assets and liabilities remaining in force.

007.03(A)(2) The extent to which the appointed actuary uses assumptions in the asset adequacy analysis that are materially different than the assumptions used in the previous asset adequacy analysis;

007.03(A)(3) The amount of reserves and the identity of the product lines that had been subjected to asset adequacy analysis in the prior opinion but were not subject to analysis for the current opinion;

007.03(A)(4) Comments on any interim results that may be of significant concern to the appointed actuary;

007.03(A)(5) The methods used by the actuary to recognize the impact of reinsurance on the company's cash flows, including both assets and liabilities, under each of the scenarios tested; and

007.03(A)(6) Whether the actuary has been satisfied that all options whether explicit or embedded, in any asset or liability (including but not limited to those affecting cash flow embedded in fixed income securities) and equity-like features in any investments have been appropriately considered in the asset adequacy analysis.

007.03(B) The regulator asset adequacy issues summary shall contain the name of the company for which the regulatory asset adequacy issues summary is being supplied and shall be signed and dated by the appointed actuary rendering the actuarial opinion.

~~009.03~~007.04 Conformity to Standards of Practice

The memorandum shall include a statement:

"Actuarial methods, considerations and analyses used in the preparation of this memorandum conform to the appropriate Standards of Practice as promulgated by the Actuarial Standards Board, which standards form the basis for this memorandum."

010. Additional Considerations for Analysis

010.01 — Aggregation

~~For the asset adequacy analysis for the statement of actuarial opinion provided in accordance with 008 of this regulation, reserves and assets may be aggregated by either of the following methods:~~

~~010.01(A) — Aggregate the reserves and related actuarial items, and the supporting assets, for different products or lines of business, before analyzing the adequacy of the combined assets to mature the combined liabilities. The appointed actuary must be satisfied that the assets held in support of the reserves and related actuarial items so aggregated are managed in such a manner that the cash flows from the aggregated assets are available to help mature the liabilities from the blocks of business that have been aggravated.~~

~~010.01(B) — Aggregate the results of asset adequacy analysis of one or more products or lines of business, the reserves for which prove through analysis to be redundant, with the results of one or more products or lines of business, the reserves for which prove through analysis to be deficient. The appointed actuary must be satisfied that the asset adequacy results for the various products or lines of business for which the results are so aggregated:~~

~~010.01(B)(1) — Are developed using consistent economic scenarios, or~~

~~010.01(B)(2) — Are subject to mutually independent risks, i.e., the likelihood of events impacting the adequacy of the assets supporting the redundant reserves is completely unrelated to the likelihood of events impacting the adequacy of the assets supporting the deficient reserves.~~

~~In the event of any aggravation, the actuary must disclose in his or her opinion that such reserves were aggregated on the basis of method 010.01(A), 010.01(B)(1) or 010.01(B)(2) above, whichever is applicable, and describe the aggregation in the supporting memorandum.~~

~~010.02~~ Selection of Assets for Analysis

~~The appointed actuary shall analyze only those assets held in support of the reserves which are the subject for specific analysis, hereafter called "specified reserves." A particular asset or portion thereof supporting a group of specified reserves cannot support any other group of specified reserves. An asset may be allocated over several groups of specified reserves. The annual statement value of the assets held in support of the reserves shall not exceed the annual statement value of the specified reserves, except as provided in 010.03 below. If the method of asset allocation is not consistent from year to year, the extent of its inconsistency should be described in the supporting memorandum.~~

~~010.03~~ 007.05 Use of Assets Supporting the Interest Maintenance Reserve and the Asset Valuation Reserve:

An appropriate allocation of assets in the amount of the Interest Maintenance Reserve (IMR), whether positive or negative, ~~must~~ shall be used in any asset adequacy analysis. Analysis of risks regarding asset default may include an appropriate allocation of assets supporting the Asset Valuation Reserve (AVR); these AVR assets may not be applied for any other risks with respect to reserve adequacy. Analysis of these and other risks may include assets supporting other mandatory or voluntary reserves available to the extent not used for risk analysis and reserve support.

The amount of the assets used for the AVR ~~must~~ shall be disclosed in the Table of Reserves and Liabilities of the opinion and in the memorandum. The method used for selecting particular assets or allocated portions of assets ~~must~~ shall be disclosed in the memorandum.

~~010.04~~ Required Interest Scenarios

~~For the purpose of performing the asset adequacy analysis required by this regulation, the qualified actuary is expected to follow standards adopted by the Actuarial Standards Board; nevertheless, the appointed actuary must consider in the analysis the effect of at least the following interest rate scenarios:~~

~~010.04(A) — Level with no deviation;~~

~~010.04(B) — Uniformly increasing over ten (10) years at a half percent per year and then level;~~

~~010.04(C) — Uniformly increasing at one percent per year over five (5) years and then uniformly decreasing at one percent per year to the original level at the end of ten (10) years and then level;~~

~~010.04(D) — An immediate increase of three percent (3%) and then level;~~

~~010.04(E) — Uniformly decreasing over ten (10) years at a half percent per year and then level;~~

~~010.04(F) — Uniformly decreasing at one percent per year over five (5) years and then uniformly increasing at one percent per year to the original level at the end of ten (10) years and then level; and~~

~~010.04(G) — An immediate decrease of three percent (3%) and then level.~~

~~For these and other scenarios which may be used, projected interest rates for a five (5) year Treasury Note need not be reduced beyond the point where the five (5) year Treasury Note yield would be at fifty (50%) of its initial level.~~

~~The beginning interest rates may be based on interest rates for new investments as of the valuation date similar to recent investments allocated to support the product being tested or be based on an outside index, such as Treasury yields, of assets of the appropriate length on a date close to the valuation date. Whatever method is used to determine the beginning yield curve and associated interest rates should be specifically defined. The beginning yield curve and associated interest rates should be consistent for all interest rate scenarios.~~

~~010.05~~007.06 Documentation

The appointed actuary shall retain on file, for at least seven (7) years, sufficient documentation so that it will be possible to determine the procedures followed, the analyses performed, the bases for assumptions and the results obtained.

011008. Severability

If any section of this regulation, or the applicability thereof to any person or circumstance, is held invalid, the remainder of the rule and the application of such provision to other persons or circumstances shall not be affected thereby.

012. Operative Date

~~This regulation shall become operative on October 1, 1995.~~
